## BUILDING A CHATBOT:

The screenshot displays the IBM Cloud Watson Assistant management interface. The main heading is 'Watson Assistant-20', which is marked as 'Active'. A left-hand navigation menu includes 'Manage', 'Service credentials', 'Plan', and 'Connections'. The 'Manage' section is currently selected, showing a 'Start by launching the tool' area with buttons for 'Launch Watson Assistant', 'Getting started tutorial', and 'API reference'. To the right, a 'Plan' section shows the current plan is 'Lite' with an 'Upgrade' button. Below these, the 'Credentials' section is visible, containing fields for 'API key' (masked with dots) and 'URL' (set to 'https://api.au-syd.assistant.watson.cloud.ibm.com/instances/c9725f2c-df35-4683-8958-3989a7075028/3A/home'). The browser's address bar shows the full URL of the assistant instance. The Windows taskbar at the bottom indicates the time is 1:59 PM on 16/11/2022.
